PROFESSIONAL SUMMARY

Java Backend Developer with **2.9 years of experience** developing scalable backend solutions using **Java, Spring Boot, and Microservices**. Skilled in creating **RESTful APIs**, integrating **Apache Kafka** for asynchronous communication, and applying **Redis caching** to improve application efficiency across **Panasonic and Nirvana Studios platforms**. Proficient in **MySQL, MongoDB, Docker, AWS, Jenkins CI/CD, Logback, JUnit 5, Mockito, and Swagger/OpenAPI**, with practical knowledge of service integration, database optimization, production troubleshooting, and reliable feature delivery.

SKILLS

Languages & Frameworks: Java, Core Java, Java 8+, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, React.js, JavaScript

Architecture & Design: Microservices, REST APIs, MVC, Layered Architecture, API Validation, DTO Mapping, Exception Handling, Reusable Components

Databases & Caching: MySQL, MongoDB, Redis, SQL, JPA, Query Optimization, Database Indexing

Messaging & Streaming: Apache Kafka, Event-Driven Architecture, Asynchronous Processing, Kafka Producers, Kafka Consumers

Cloud & DevOps: AWS, EC2, Docker, Jenkins, CI/CD Pipelines, Maven, Git

Testing & Quality: JUnit 5, Mockito, Unit Testing, Integration Testing, Functional Testing, Regression Testing, Cross-Browser Testing

Tools & Monitoring: GitHub, IntelliJ IDEA, Swagger/OpenAPI, Postman, Logback, JIRA

PROFESSIONAL EXPERIENCE

TapQwik Software Private Limited — Jun 2024 – Present

Software Engineer

- **Developed** Java and Spring Boot microservices supporting **Panasonic** business workflows.
- **Established** REST API contracts with request validation, DTO transformation, standardized responses, and exception handling.
- **Integrated** Apache Kafka for asynchronous event processing and reliable communication between distributed services.
- **Configured** Redis caching for frequently accessed endpoints, reducing dependency on repeated database reads.
- **Refined** MySQL queries and JPA data-access operations while utilizing MongoDB for flexible document-based requirements.
- **Supported** Dockerized application packaging, AWS deployments, and automated releases through **Jenkins CI/CD**.
- **Investigated** production API and data issues using **Logback logs, SQL analysis, and structured troubleshooting**.
- **Created** unit tests using **JUnit 5 and Mockito** and maintained accurate **Swagger/OpenAPI** documentation.

Nirvana Studios — Dec 2023 – Jun 2024

Frontend Web Developer (Internship)

- **Developed** a responsive static website using **React.js, JavaScript, HTML, and CSS** based on business and design requirements.
- **Created** reusable React components for common layouts, navigation elements, and content sections, improving consistency across pages.
- **Implemented** responsive UI designs for desktop and mobile screens with emphasis on usability and intuitive navigation.
- **Integrated** interactive frontend elements using JavaScript and React to provide a smooth user experience.
- **Optimized** page structure, assets, and component rendering to improve website loading performance.
- **Tested** web pages across major browsers and screen sizes to identify layout, compatibility, and functional issues.
- **Resolved** frontend defects related to styling, responsiveness, component behavior, and browser rendering.

KEY PROJECTS

Panasonic — Digital E-Commerce & Order Management Platform · Retail · Catalog & Orders

Tech Stack: Java 8+, Spring Boot, Hibernate, Kafka, MySQL, MongoDB, Redis, AWS, Docker, Jenkins, JUnit, Swagger

Panasonic — Digital E-Commerce & Order Management Platform is an enterprise backend application covering product listing, order placement, order tracking, and inventory updates. The system is implemented as Java Spring Boot microservices exposing REST APIs, using Kafka for asynchronous event processing, Redis for high-read caching, and MySQL/MongoDB for transactional and document data. Work included API development, service integration, database optimization, Docker/AWS deployment support, and production debugging.

- Owned backend development for **product listing, order placement, order tracking, and inventory updates** including API design, persistence, and service integration.
- Created **OpenAPI/Swagger** specs and Postman collections for reliable frontend integration.
- Implemented idempotent processing patterns for **Kafka consumers** to avoid duplicate event side-effects.
- Hardened APIs with validation, structured exceptions, and consistent error responses.
- Balanced **MySQL** transactional writes with **MongoDB** document storage for flexible attributes.
- Supported scalability through microservice boundaries, caching, and asynchronous processing.
- Contributed to **JUnit 5/Mockito** tests and SonarQube-driven code quality fixes.
- Assisted production releases and post-deploy verification of critical backend endpoints.

Key Achievements

- Improved high-read API responsiveness by **30%** through **Redis caching**, database indexing, and **JPA/SQL query optimization**.
- Maintained **85%+** unit test coverage on critical services using **JUnit 5 and Mockito** with peer reviews and CI testing.

Nirvana Studios — Nirvana Studio Website

Tech Stack: React.js, HTML, CSS, JavaScript

During my internship at Nirvana Studios, I designed and developed the company's complete official website from scratch using React. The website is a fully responsive, static frontend that showcases the studio's vision, games, services, and team with a modern and engaging user interface. I focused on creating an intuitive user experience, optimizing performance, and ensuring compatibility across different devices and browsers.

- Designed and developed the complete static website using React.js.
- Built a responsive and user-friendly interface with reusable components.
- Implemented modern UI/UX designs using HTML, CSS, JavaScript, and React.
- Optimized performance and ensured cross-browser compatibility.

Key Achievements

- Improved critical API/service reliability through structured debugging, validation checks, and targeted backend fixes.
- Strengthened delivery quality with unit/integration testing, code reviews, and production issue resolution.

EDUCATION

B.Tech (CSE)

Shivalik College of Engineering, Dehradun, Uttarakhand (Uttarakhand Technical University, Dehradun)

SOFT SKILLS

Adaptability, Problem Solving, Communication, Ownership, Analytical Thinking, Team Collaboration, Time Management
